triple 7 Heavy Duty

Effective

triple 7 Heavy Duty contains Supersolve, a non-aromatic plant based Industrial solvent that gives the extra 'bite' for removing heavy build-ups.

Safe for Equipment

Unlike caustic cleaners, triple 7 Heavy Duty does not 'burn' off soil to clean but uses the power of colloidal suspension to surround the soil that it can be lifted away without damaging the cleaning surface. triple 7 Heavy Duty penetrates and lifts hydrocarbon soils including fats, oils, greases, proteins and sugars.

Non-Corrosive

Because triple 7 Heavy Duty is non-corrosive, it is safe for metals, rubber and virtually all other surfaces, and what's more, residual triple 7 Heavy Duty acts as a rust inhibitor and is a natural lubricant.

Makes your Systems preform Better

triple 7 Heavy Duty enhances the functioning of oil/water separators, making your systems preform better.

No Special Storage Requirements

triple 7 Heavy Duty has no Hazchem rating so it needs no special storage areas.

Safe for your Workers

triple 7 Heavy Duty does not contain chemicals determined by the EPA or OH&S to be carcinogenic or suspected carcinogens, therefore you are preventing future litigation claims.

Enhances Workplace Safety

You can replace hazardous products without changing equipment or procedures and because triple 7 Heavy Duty is free of hazardous air pollutants and toxic chemicals, it is safe to use in confined areas.

Safe to use in Food Processing Areas

triple 7 Heavy Duty has accreditation, making it safe to use in Registered Meat Establishments.

Save on Disposal Costs

triple 7 Heavy Duty may be filtered of contaminants and reused or recycled for long-term cleaning systems - a cost saving for you and best of all, the product is acceptable for landfill disposal.

Safe for the Environment

triple 7 Heavy Duty contains no ozone depleting chemicals or hazardous air pollutants and the product is 100% biodegradable. Furthermore, triple 7 Heavy Duty will not upset the balance of nature's ecosystems and you will have no problem with run-off polluting our waterways.

Cost Effective

triple 7 Heavy Duty is highly concentrated, so a little goes a long way. Plus, you can use the product for so many different applications - you don't need a lot of different products - making it simple for your staff to use.

Application is Easy

triple 7 Heavy Duty may be applied manually, through sprayers, pressure washers, steam cleaners, auto scrubbers, parts washers, ultrasonics, dip baths or foaming, washing and dispensing equipment. triple 7 Heavy Duty is low foaming, free rinsing, highly miscible in water and may be rinsed with hot or cold water.
