Surface Prep

Surface Preparation and Degreaser

*Are your clean-up solvents toxic,
dangerous or explosive?*

purasolve Surface Prep is a unique cleaning compound, developed to replace MEK, Toluene, Trichlorethane and other dangerous air pollutants in hand wipe cleaning applications.

- Non-dangerous & non-explosive
- Low vapour pressure, high flash point
- Slow evaporating, reduce product use
- Reduce VOC emissions
- Low odour, improved OH&S levels

purasolve Surface Prep

Benefits

- > Eliminate the risk of handling and use of explosive and toxic chemicals
- > Eliminate cost of product lost through evaporation
- > Improved user safety and comfort with low odour and high flash point
- > Reduce your environmental footprint through eliminating VOC emissions
- > No residue from high evaporation levels requiring re-cleaning

Testimonials

“ Its use allowed the company to avoid regulatory demands, representing savings in administrative time and in investments in control technology, as well as a decreased potential for future liability concerns.”

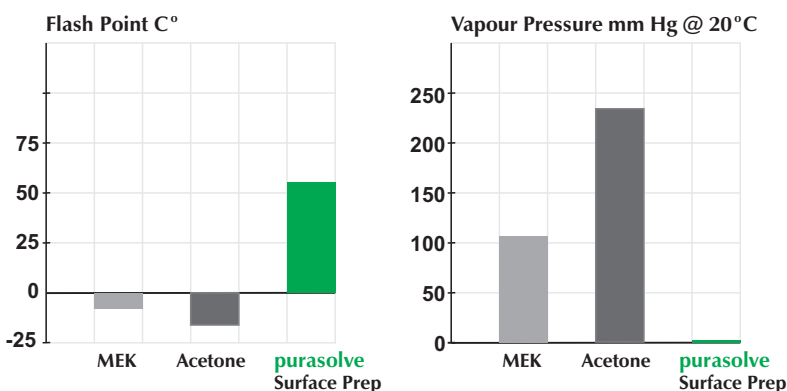

Transport Industry Manufacturer

“ Because purasolve Surface prep evaporates more slowly than MEK, it is consumed at a much slower rate than MEK.”

Industrial Coatings Facility

“ Because of the low toxicity of the purasolve product we found that we could launder and reuse the wipe rags used in cleaning. We had been disposing of these rags as hazardous waste.”
