Odourless, pre-moistened patches
that make field cleaning easy.

- > **Powerful**
- > **Convenient**
- > **Economical**
- > **Odourless & safe for the user.**

Tomorrow's Compliance Today

Product Application Sheet – purasolve WEAPONS CLEANING PATCHES

purasolve patches are designed to provide a convenient, more efficient way to clean weapons while at the base, during Field Training Exercises or while on deploy.

- > **Convenient** – are designed to be carried in knapsacks, pockets and weapons cleaning kits or as part of the resupply systems.
- > **Economical** – WCP's come in a re-sealable package. Use as many as needed to clean the weapon and reseal the package to use the remaining patches another time. The spent patches can be repacked into the original package for future disposal.
- > **No Special Regulatory Requirements** – is a state of the art solvent designed to help users break out of the tangle of regulations regarding emissions, disposal and industrial health hazards.
- > **Enhances Security** – the patches are virtually odourless, which allows for battlefield security when in hide positions or departing an area. The cleaning solvent is low toxicity, high-purity hydrocarbon solvent.
- > **No Special Storage & handling issues**
